25X1A

When the planes landed again, the runway was lighted by searchlights. The MiG-15s involved flew with their position lights burning. Air activity continued until after 9 $p_{\rm e}m_{\rm e}$

23 April. There was intermittent air activity throughout the day. At 4 p.m., a transport plane took off.

2. The security measures taken around the field were maintained. They were explained to the local population by the fact that several radio installations were located in the area.

25X1A

Comment. Feenemuende airfield was vacated because of the threat of flood in late January. It is believed that the Soviet naval air force unit previously stationed there has returned to the installation in the meantime.
